You can either use the meeting functions or download a CSV list.

Exhibitors have the benefit of being able to manage time slots on their stand, to ensure meetings don't clash with other colleagues.

Sustainability

Our aim is to create a future fit for everyone. We therefore publicly support a 1.5°C future and are aligning our climate mitigation targets to reach Net Zero Global emissions by 2050 at the latest across our company operations.

Part of the event's carbon footprint as a whole are its' exhibitors and attendees. So here at CRMP, we want to highlight a number of ways that you can make your attendance at the event more sustainable and reduce your carbon footprint.

Exhibitors can make many small changes to aid the overall carbon reduction of the event.

- Why not minimise/remove the use of printed marketing materials like brochures & flyers? We have a limited number of TV screens available for hire during the event which can display media of your choice. If you are interested in booking a TV screen please email info@completelyevents.com.
- Think about what event giveaways you may be bringing and whether they are necessary. How many pens are you wanting to take home at the end of the day?
- Still want to bring a giveaway? Think about the carbon footprint of those elements. Can they be reused or recycled easily?
- Does your business have a sustainability policy? Share it with us so we can rave about your sustainability efforts and journey towards net zero.
